PROFILE

Occupational and Transportation Safety Consultant, Expert Witness, Trainer, and Safety Presenter

David Stauffer is a Certified Safety Professional since 1999 and has been involved managing, training and leading within the safety field for the past 17 years. His background is rooted with hands on experience from working and communicating with the doers in the field to the executives in the corner office. David started his safety professional career after the Army and Collage with a large municipality in the Midwest before working his way up through the ranks of management in the waste, warehousing, and transportation industries, all in the capacity of managing and directing safety.

David Stauffer's safety consulting professional experience includes working with companies in the transportation, waste disposal, construction, warehousing/logistic, manufacturing steel, and automobile industries. He provided professional safety consulting services which covers consultation with attorneys for expertise in safety/transportation litigations to include; investigations, field work, research, reports, affidavits, interruptions of regulations, deposition testimony and trial testimony, conducting safety and risk control Insurance Audits for Insurance Brokers, writing loss control safety programs, completing full scale safety audit that identified areas of improvement for OSHA and DOT regulatory compliance, and creating loss control processes that tracked accidents, identified trends, developed root causes, implemented corrective actions, and computed financial losses.

Other areas of expertise include safety analysis, industrial safety, slips trips falls, safety inspections, incident investigation, workplace safety, construction site safety hazards identification, ergonomics, safety engineering, OSHA / DOT compliance, OSHA/DOT inspections, OSHA/DOT regulations, Drivers Qualification files, multi-employer work site safety responsibility.

Mr. Stauffer's goal is to provide professional safety services, accurate assessment regarding safety related issues, provide his clients with an increased level of safety awareness, create a committed world class safety culture in their work place, and save time, energy, and bottom-line dollars. He will accomplish this with a proactive approach that is professional and high energy.

PROFESSIONAL SAFETY CONSULTING EXPERIENCE

Safety Compliance Solutions, LLC

President

- Safety Director for second shift at Riley Hospital Simon Tower Project. Complete daily safety inspections. Report and correct unsafe issues. Provide training and program development on safety related items.
- Implemented safety, environmental, and transportation audit programs. These programs ensured that all required regulatory environmental and safety standards were in place and identified potential risks/exposures. This was completed for the following companies: Morgan Tire, Mawson & Mawson, Inc., Arrothin Plastic Material. Inc., Jack Gray Transport, and Imlach Movers.
- Completed Emergency Management Preparedness Plans, audited sites, DQ File Audit, and developed loss prevention programs for 7th Transport Company and CSU Transport, Inc.
- Conducted industrial hygiene monitoring to determine employees' exposures and provided needed corrective action for project task for DSC Logistics.
- Developed and instructed Safety/Transportation for Two Men and a Truck employees at their home office in Lansing, MI. The training sessions were titled Safety Awareness/Leadership Training and Advanced Drivers Training. Both were designed to focus on managing the strict safety/transportation compliance issues the company requires.
- Facilitated Safety Awareness Training for FDR Safety that focused on Behavior Motivation at Granite City Steel, Inc. The training was an 8 Hour high energy, fast-paced session that was designed to increase awareness and change poor unsafe work attitudes/behaviors to motivating positive safe work habits.
- Conducted safety and risk control Insurance Audits for Insurance Brokers. These included in-depth evaluations of OSHA required written safety programs, site inspection, fire safety inspection, safety training documentation, OSHA 300 Logs, PPE requirements, environmental labeling, and proper waste disposal. Completed Audits for Ace Anodizing & Impregnating, Wolverine Plating Corp., United Transportation Systems, Z-Patch, Inc., Benchmark, Inc., and John Henry Foster, Inc.
- Expert witness and professional safety consulting services which covers consultation with attorneys for expertise in safety/transportation litigations to include; investigations, field work, research, reports, affidavits, interruptions of regulations, deposition testimony and trial testimony.
- Beginning in 2008, I have been hired on as an expert witness with four Law Offices and five Attorneys. The states where the cases resided in are Ohio, Pennsylvania, Missouri and Illinois. All the cases were related to the transportation industry and three were the results of vehicle accidents.

EMPLOYMENT

District Manager

Waste Management, Indianapolis, IN

- Directed 85 full-time union employees and five managers at two Central Indiana sites for this world leader in Environmental Management Services. Oversaw daily operations, including maintenance, safety/risk, environmental, and customer service. Facilitated weekly meetings to coach and motivate all levels of employees. Annual revenue for both district locations was \$18 million with operating earnings of over 22 percent.
- Developed and managed operational Profits and Losses (P&L) budgets for multiple lines of business. Responsibilities included: managing operating metrics, diagnosing and implementing procedures to improve efficiencies, productivity, and safety; conducting regular in-depth Strategic Business Plan reviews to make process improvements; rerouting and scheduling work loads to maximize collection efficiency; coordinating with sales staff to ensure profitability of accounts; and coaching/mentoring employees to create effective and positive working relationships.

Market Area Safety Manager

Waste Management, Indianapolis, IN

- Supported 18 operating locations throughout the Indiana Area Market in environmental, health, and safety discipline of Waste Management's hauling, transfer, and recycle center operations. This included maintaining environmental, health, and safety permits and regulatory compliance of OSHA/ DOT.
- Created safety awareness through site visits, safety blitzes, newsletters, behavioral modification assessments, and safety awareness training. This reduced total incident by 10% each year from 2003-2005.
- Directed and supported area operation supervisors and managers in safety compliance and risk management issues by emphasizing the prevention of accidents and injuries through safe work practices. Tracking accident trends, detailed claims management, and focusing on root cause investigations, corrective action implementation, and specific/ ongoing training accomplished this.
- Mentored, coached and trained managers, supervisors, and drivers in the new Behavioral Based Safety Training, Observational Assessment Behavior (OBA) Training, and Safe Operating Practices.

Corporate Director of Risk Management

Specialty Transportation Services, Inc. Portage, IN

- Managed Safety and Loss Control for this large Midwest short haul Transportation Company. Created and directed loss control processes that tracked accidents, identified trends, developed root causes, implemented corrective actions, and computed financial losses. These programs reduced accident costs by over \$1 million dollars in calendar year 2000 and \$400,000 in calendar year 2001.
- Directed company compliance in safety, environmental/industrial hygiene, transportation and insurance. Responsibilities included: advising five regional vice presidents; establishing hiring guidelines to 15 terminal managers; managing five employees; maintaining regulatory environmental permits for local operating locations in over 30 states; managing semi-self insured AL, GL, WC & PD claims; developing and presenting training materials for over 700 drivers to include New Hire Training, Safety Awareness Training, and required yearly Regulatory Training.

- Implemented safety, environmental, and transportation audit programs. These programs ensured that all required regulatory environmental and safety standards were in place and identified potential risks/exposures.

Corporate Safety Manager

DSC Logistics, Inc., Des Plaines, IL

- Directed all aspects of health, safety, and transportation compliance for the largest privately owned national warehouse/logistics company. Responsibilities included: Overseeing 22 safety coordinators in 14 states; interfacing with local, state, and federal regulatory agencies; permitting transportation and hazardous material licenses; developing training materials and training field safety personnel. Also completed Emergency Management Preparedness Plans, audited sites and developed loss prevention programs.
- Developed reporting system to track and analyze accident and injury trends. This system successfully reduced the frequency of accidents by 40% and decreased loss claim dollars from \$1,400,000 to \$585,000 in calendar year 1999. Led the Corporate Accident review Committee to better determine root causes, prevention methods, and disciplinary actions.
- Represented company in Department of Labor issues. Abated OSHA citations and negotiated settlement of fines.
