To Whom it May Concern:

**Re: Thomas Berger, MD**

Dr. Thomas Berger acted as an expert witness for me in a recent medical malpractice case. Our firm specializes in personal injury including med-mal and has an outstanding track record and reputation in this field. Consequently I am well qualified to evaluate Dr. Berger's performance.

Throughout the preparation of the case, Dr. Berger was readily available and promptly responsive to all requests from my office. His understanding of the legal aspects of med-mal litigation far exceeded that of most physician experts. This permitted Dr. Berger to focus on the key issues of the case and to provide clear concise and relevant information. His written work product was cogently presented with pertinent details from the medical record and extensive support from the scientific literature.

The case did go to trial and Dr. Berger's testimony was crucial. On the witness stand, Dr. Berger was at ease and professorial. He was intimately familiar the medical record and was able to promptly support all of his opinions with specific references to the medical literature. He made eye contact with the jurors and directed his testimony to them. Dr. Berger withstood an aggressive cross examination while remaining composed and effective. He had obviously anticipated all of the defense attorney's arguments and was ready and able to calmly and dispassionately demolish each of them.

Thanks in part to Dr. Berger's testimony, a multimillion dollar jury verdict was achieved. Dr. Berger has my highest recommendation.

Very truly yours,

DANKNER, MILSTEIN & RUFFO, PC.
